Company profile

Since 2006, TDM Electronics has been involved in the **recycling** of professional **electronic and telecommunication equipment** as well as **industrial automation systems**.

The **industries** we are working with include:

- **Telecommunications and IT** (e.g. fixed and mobile telecommunications, data centers)
- **Military** (e.g. aviation, navy)
- **Power generation and mining** (e.g. mines, power plants, refineries, oil platforms)
- **Transportation** (e.g. railways, aviation, shipbuilding)
- **Manufacturing** (e.g. cars, machinery)

We operate with focus on **flexibility** and **efficiency**, while following the **Polish and international regulations**, in particular those regarding the **environmental protection and safety**.

"Years of experience accompanied by passion – that's what our success is based on."
Tomasz Stawiński, PhD

Scope of services

We ensure the **highest quality** and **effectiveness** of our operations by providing a **comprehensive scope of services**:

- **Dismantling** of machinery and equipment
- **Recycling** and recovery of metals
- **Storage and logistics**
- **Demilitarization** services
- **Sales** of equipment

"We are able to propose at least 3 solutions to any problem our Client may have."

Monika Wardak, President

Processing methods to minimize environmental impact
